1. Project ID: ITP_SE_16

2. Project Title: Boarding booking management system

3. Campus: Malabe

4. WD/WE: Weekday

5. Group Information:
   Stream: SE 1.2

	Registration Number	Student Name	Phone Number	Signature
01	IT24102850	Chamika K H	+94 74 190 6332	
02	IT24102413	Amarathunga N N	+94 72 105 7034	
03	IT24103931	Dissanayake Y I	+94 70 528 3968	
04	IT24103987	Ilma M S F	+94 71 093 1711	
05	IT24101976	Jaliya H A W	+94 76 906 6322	
06	IT24102826	Denesh N	+94 75 039 1623	

6. Project Justification

The Boarding Booking Management System appropriately represents the purpose of our project, as the platform manages the complete boarding process rather than a single function. The system integrates room discovery, roommate matching, booking workflows, digital agreements, payment tracking, and tenant management within one structured environment. Therefore, the term *Management System* accurately reflects the comprehensive and organized nature of the solution.

7. A brief description of the problem.

Classification: Public-SLIIT

Finding a suitable boarding facility is a major challenge for university students, as existing options are scattered across unreliable sources and lack structured information. Students often struggle to evaluate availability, pricing, facilities, and compatibility, while boarding owners rely on inefficient manual processes. This results in confusion, wasted time, and a lack of trust in the overall boarding selection process.

8. Main Features of the Proposed System.

Classification: Public-SLIIT

	Registration Number (Same order as above)	Name of Feature/s	Brief description of feature(s) in point form
01	IT24102850	Roommate Finder & Group Formation	• Create roommate profile (description, budget, habits, gender/study preferences) • Tag current boarding house (if 1 vacancy left) or planned boarding house • Browse profiles and send/accept roommate requests • Create booking groups, invite members, and receive notifications • Supports two scenarios: joining existing room or forming group for new place
02	IT24102413	Booking & Agreement Management	• Submit individual or group booking requests • Owner reviews and approves/rejects bookings with status tracking • Auto-generate digital rental agreement (fills student names, room details, rent, period) • Students review and digitally accept (checkbox + confirm) • Owner confirms → signed agreement saved as downloadable PDF • Digital agreement signs before bookings
03	IT24103931	Payment & Rental Management	• Pay advance, security deposit, and monthly rent through the system • Support split payments for shared rooms/groups • View personal payment history and download receipts • Automatic due-date reminders & payment overdue reminders • Allow owner to cancel a membership if didn't pay within overdue time • Owners see payment status per tenant/room and track who has paid
04	IT24103987	Boarding House & Room Management	• Add, edit, and delete boarding houses and individual rooms

Classification: Public-SLIIT

			• Upload photos, set prices, facilities (Wi-Fi, bathroom, meals, AC, etc.), and number of beds/vacancies • Manage availability and mark rooms as full/partially occupied • Tenant Overview Dashboard: See exactly who lives in each room (e.g., Room 302: Alice, Bob, Charlie) • View and download payment receipts for tenants • Handle listing ratings
05	IT24101976	Administration & Monitoring	• Verify student registrations (Student email) • Facility owner verification with their NICs and selfies • Approve or reject boarding owner registration requests • Moderate user profiles, and handle complaints/disputes • Platform review management • Ensure overall security and trust in the platform
06	IT24102826	Search, Filtering & Discovery	• Powerful search + real-time filters (price range, distance from campus, facilities, room type, availability, rating) • Saved searches, and helpful “no results” suggestions • AI chatbot for enhanced searching and sorting • Location based filtering

Classification: Public-SLIIT
